The Westin Arlington Gateway, with its prominence in the skyline of Arlington, Virginia, opened to wide acclaim in 2006. By creating an urban resort ForrestPerkins established a new standard of design for Westin Hotels & Resorts Worldwide. The luxurious resort style interiors belie its location in the center of a cosmopolitan area adjacent to our Nation's Capitol.

Rather than placing an emphasis on strong pattern and bold hues, ForrestPerkins turned its focus to a subtle, restful palette combined with supple textures and custom lighting. Exceptional botanical designs that incorporate indigenous flowers and plants combined with unique artwork commissioned by local Virginia artists provide a sense of place. The interior architecture is artfully sculpted to create interior spaces that flow seamlessly inviting guests to escape, relax, and rejuvenate.
